USE & MAINTENANCE

Maintenance materials

Metalli / Metals

Alluminio: Grazie alla fusione di più leghe di alluminio che ne garantiscono solidità, maneggevolezza ed inattaccabilità alla ruggine, è un materiale di elevata qualità e permette di raggiungere i massimi risultati qualitativi ed estetici.

Inox: L'acciaio inossidabile è un materiale che, grazie alla sua alta resistenza alla corrosione e alle caratteristiche meccaniche di rilievo, risulta maggiormente duraturo e affidabile nel tempo.

Acciaio: Lega di ferro e carbonio con percentuale di carbonio inferiore al 2% trattata per resistere agli agenti atmosferici con il processo della cataforesi e verniciatura a polvere.

Manutenzione: Per mantenere a lungo il prodotto in buone condizioni, consigliamo una corretta pulizia periodica, particolarmente frequente in località caratterizzate da forte umidità e clima marino. Si raccomanda di pulire le superfici con un panno morbido utilizzando acqua o detergenti neutri. Prolungate ed ininterrotte esposizioni a intense radiazioni UV o a temperature molto rigide possono incidere sulle caratteristiche iniziali del rivestimento estetico colorato costituito da poliestere. Consigliamo di pulire e conservare in luoghi riparati i prodotti durante periodi d'inutilizzo prolungato e invernali.

Aluminum: Thanks to the fusion of several aluminum alloys that guarantee solidity, manageability and rust resistance, it is a material of high quality and allows to reach the maximum qualitative and aesthetic results.

Inox: Stainless steel is a material that, thanks to its high resistance to corrosion and to the mechanical characteristics of relief, is more durable and reliable over time.

Steel: Iron and carbon alloy with carbon percentage less than 2% treated to resist to the atmospheric agents with the cataphoresis process and powder coating.

Maintenance: To keep the product in good condition for a long time, we recommend a regular cleaning period, particularly frequent in places characterized by high humidity and marine climate. We recommend cleaning the surfaces with a soft cloth using water or neutral detergents. Prolonged and uninterrupted exposures to intense UV radiation or at very low temperatures can affect the initial characteristics of the colored polyester coating. We recommend cleaning and storing products in sheltered areas during long periods of non-use and winter.

Maintenance materials

Legni / Wood

Teak: Materiale di elevata qualità ideale per la realizzazione di mobili da esterno perché estremamente resistente ai cambiamenti di temperatura, all'acqua, all'umidità e alla salsedine.

Accoya è una nuova varietà di legname di eccezionale durabilità, questo legno dalle elevate prestazioni viene prodotto con materie prime sostenibili e gestite in maniera ottimale, non è tossico ed è inoltre dotato di una stabilità dimensionale e di una durabilità in grado di superare quella dei migliori legni duri tropicali.

Trattandosi di un materiale naturale si potrebbero osservare variazioni di colore o anche crepe dovute al grado di umidità ed ai bruschi cambiamenti di temperatura. Qualora non ricevesse alcun trattamento di manutenzione, mediante l'applicazione periodica di comuni e specifici protettivi a base olio, la superficie potrebbe prendere una patina grigio argento che potrà essere eliminata con una leggera carteggiatura superficiale e successiva lucidatura con panno di iuta. Piccole macchie superficiali dovute ad olio o altri prodotti alimentari dovranno essere rimosse tempestivamente, prima che il legno possa assorbirle in profondità, carteggiando la superficie interessata e lucidandola successivamente con un panno di iuta.

Teak: High quality material suitable for outdoor furniture because it is extremely resistant to changes in temperature, water, humidity and saltiness.

Accoya is a new variety of wood characterized by an exceptional durability. This wood shows very good performances and is produced with sustainable raw material, managed in an optimal way. It is not toxic and it has got a dimensional stability. Its durability is much higher than the one of the best hard tropical wood.

Being a natural material, colour variations or even cracks due to the degree of humidity and sudden changes in temperature may be observed. If no maintenance treatment is received, through the periodic application of common and specific protective oil-based, the surface may take a silver-gray patina that can be easily removed with a light surface sanding down and subsequent polishing with a jute cloth. Small superficial stains due to oil or other food products must be removed promptly, before the wood can absorb them in depth, sanding down the affected surface and then polishing it with a jute cloth.

Maintenance materials

Corde sintetiche / Synthetic ropes

Doppia treccia costruita con anima in poliestere e copertura in propilene multi filamento.
La fibra esterna di cui è composta è impermeabile e resistente ai raggi UV.

Si raccomanda di pulire con prodotto neutro e panno non abrasivo.

Double braid made with polyester core and multi-filament propylene cover.
The external fiber is waterproof and resistant to UV rays.

It is recommended to clean with a neutral product and a non-abrasive cloth.

Cinghie elastiche / Elastic belt

Ottenute mediante la tessitura di materiali sintetici studiati per permette di essere usata all'esterno.

Si consiglia di evitare il contatto prolungato con sostanze grasse e/o coloranti che potrebbero venir assorbite dal materiale di rivestimento e dare luogo, di conseguenza, a macchie permanenti e rischiare di deteriorare la struttura del filato.
Si consiglia di evitare l'utilizzo di solventi.
Utilizzare acqua e detergenti liquidi non abrasivi con PH neutro ed incolori.

Obtained through the weaving of synthetic materials especially conceived outdoor use.

We recommend to avoid prolonged contact with greasy substances and / or dyes which could be absorbed by the covering material used and consequently cause permanent stains and risk to deteriorate the structure of the yarn. It is advisable it is suggested to avoid the use of solvents. Use water and non-abrasive liquid detergents with neutral PH and colourless.

Il calore di un forno speciale ed il vetro, completamente riciclato tramite un esclusivo processo di frantumazione e macinazione, ne trasforma la superficie rendendola migliorata nelle caratteristiche tecniche, esclusiva e capace di rispondere a tutte le esigenze del vivere l'esterno.

E' un materiale naturale che abbina i processi di produzione alla tradizione artigianale che sapientemente bilancia tempo e temperatura, donando inaspettate particolarità.

La lieve variazione di spessore e tonalità di colore sono valori di prestigio che rendono ogni prodotto unico.

The heat of a special oven and the glass, completely recycled through an exclusive crushing and grinding process, transform the surface, improving its technical characteristics and making it an exclusive product capable of meeting all the needs of outdoor living.

Nerotech is a natural material which combines the modern production processes with the traditional craftsmanship, able to skilfully balance time and temperature, giving unexpected special features.

The slight variation in thickness and colour shades are prestigious values that make each product a unique piece.

Gres porcellanato / Porcelain stoneware

Il gres porcellanato, grazie alle sue eccellenti proprietà fisiche e meccaniche, risulta essere ideale per uso esterno, essendo inattaccabile dagli agenti atmosferici e inalterabile ai raggi UV. Tale materiale viene ottenuto tramite il processo di sintetizzazione di argille ceramiche, feldspati, caolini e sabbia.

Per la pulizia dei piani in gres si consiglia l'utilizzo di un panno inumidito con acqua e detergente neutro da risciacquare ed asciugare con un panno asciutto. Nella fase di lavaggio porre particolare attenzione al fine di evitare l'accumulo di sporco o calcare.

Porcelain stoneware, thanks to its excellent physical and flexural strength, turns out to be ideal for outdoor use, being unaffected by atmospheric agents and unalterable to UV rays. This material is obtained through the synthesis process of ceramic clays, feldspars, kaolins and sand.

For the cleaning of stoneware tops it is advisable to use a damp cloth with water and a neutral detergent to be rinsed and dried with a dry cloth. During the washing phase, pay particular attention to avoid the accumulation of dirt.

Pietra / Stone

Una delle pietre più pregiate e maggiormente impiegate in outdoor è sicuramente il marmo.

Il marmo, grazie alla sua particolare composizione e natura, è una pietra poco porosa e poco assorbente, durezza e resistenza, fanno del marmo una tra le pietre più pregiate e durevoli nel tempo.

La formazione del marmo avviene mediante un processo metamorfico di cristallizzazione: il carbonato di calcio, venendo in contatto con le rocce sedimentarie, dà vita ad un insieme di cristalli di calcite e minerali vari, i quali ne determinano il colorito.

Per mantenere la lucentezza del marmo e del granito è necessario detergere giornalmente le superfici: è sufficiente diluire il sapone neutro in acqua tiepida.

Le superfici dovranno essere strofinate per mezzo di una spugna o un panno morbido. Sarà sufficiente risciacquare con un panno umido, prestando attenzione a non lasciare i fastidiosi aloni di detergente.

Marble is certainly one of the most precious and used stones for the outdoor.

Marble, thanks to its particular composition and nature, is a little porous and not absorbing stone, hardness and resistance, making marble one of the most precious and durable stones in time.

The marble formation takes place by means of a metamorphic crystallization process: calcium carbonate, coming into contact with the sedimentary rocks, gives rise to a set of crystals of calcite and various minerals, which determine the complexion.

To maintain the shine of marble and granite it is necessary to clean the surfaces daily: it is sufficient to dilute the neutral soap in warm water.

The surfaces must be rubbed with a sponge or a soft cloth. It will be sufficient to rinse with a damp cloth, being careful not to leave detergent stains
